Class Skills (6+Int modifier per level, x4 at 1st level): Climb, Concentration, Craft, Handle Animal, Heal, Hide, Jump, Knowledge (dungeoneering), Knowledge (geography), Knowledge (nature), Listen, Move Silently, Profession, Ride, Search, Spot, Survival, Swim, and Use Rope.

Game Rule Information

Alignment: Any.

Hit Die: d8.

Class Features

Weapon and Armor Proficiency: A hunter is proficient with all simple and martial weapons, and with light armor and shields (except tower shields).

Studied Prey (Ex): At 1st level, a hunter selects a type (and, if applicable, a subtype) of creature from the list below. The hunter gains +1 bonus on Bluff, Listen, Sense Motive, Spot, and Survival checks when using these skills against creatures of this type. Likewise, they get the same bonus on weapon damage rolls against such creatures.

As a hunter gains levels, their bonus to skill checks and to damage rolls also increase, as indicated by the class progression table.

While a hunter's immediate study applies to a limited set of creatures, they may have knowledge of multiple more. If they have 4 ranks in the Knowledge skill associated with a creature type (and subtype), they can add that type to their list of studied prey. For each rank above 4, they can add another type. These are in addition to the one they automatically get as part of this feature. For example, a Hunter with 6 ranks in Knowledge (arcana) has all constructs, dragons and magical beasts in their list of studied prey, as well as any other one creature type they desire, regardless of their Knowledge skills.

Type (Subtype)	Associated Knowledge	Type (Subtype)	Associated Knowledge
Aberration	dungeoneering	Humanoid (reptilian)	local
Animal	nature	Magical beast	arcana
Construct	arcana	Monstrous humanoid	nature
Dragon	arcana	Ooze	dungeoneering
Elemental	planes	Outsider (air)	planes

Type (Subtype)	Associated Knowledge	Type (Subtype)	Associated Knowledge
Fey	nature	Outsider (chaotic)	planes
Giant	nature	Outsider (earth)	planes
Humanoid (aquatic)	local	Outsider (evil)	planes
Humanoid (dwarf)	local	Outsider (fire)	planes
Humanoid (elf)	local	Outsider (good)	planes
Humanoid (goblinoid)	local	Outsider (lawful)	planes
Humanoid (gnoll)	local	Outsider (native)	planes
Humanoid (gnome)	local	Outsider (water)	planes
Humanoid (halfling)	local	Plant	nature
Humanoid (human)	local	Undead	religion
Humanoid (orc)	local	Vermin	nature

A hunter can swap their active prey in 1 week of downtime. As they increase in levels, this restudying can be completed much more quickly.

Track: A hunter gains Track as a bonus feat.

Weapon Finesse:A hunter gains Weapon Finesse as a bonus feat, allowing them to add their Dexterity bonus to attack rolls made with light weapons, rather than Strength.

Combat Style (Ex): At 2nd level, a hunter selects one of two combat styles to pursue: archery or two-weapon combat. This choice grants bonus feats at certain levels, even if the hunter does not have the normal prerequisites for them, but only when they wear light or no armor. All the benefits of combat style feats, as well as those that have them as prerequisites, are lost when wearing medium or heavy armor.

Level	Archery	Two-weapon combat
2	Rapid Shot	Two-Weapon Fighting
6	Manyshot	Improved Two-Weapon Fighting
11	Improved Precise Shot	Greater Two-Weapon Fighting

If desired, a hunter can take these feats normally to benefit from them in heavier armor.

Wild Empathy (Ex): A 2nd level hunter can improve the attitude of an animal. This ability functions just like a Diplomacy check to improve the attitude of a person. The hunter rolls 1d20 and adds their hunter level and their Charisma bonus to determine the wild empathy check result. The typical domestic animal has a starting attitude of indifferent, while wild animals are usually unfriendly.

To use wild empathy, the hunter and the animal must be able to study each other, which means that they must be within 30 feet of one another under normal visibility conditions. Generally, influencing an animal in this way takes 1 minute, but, as with influencing people, it might take more or less time.

The hunter can also use this ability to influence a magical beast with an Intelligence score of 1 or 2, but he takes a -4 penalty on the check.

Keep in mind that a character with 5 or more ranks in Handle Animal gains a +2 bonus to wild empathy checks.

Endurance: A hunter gains Endurance as a bonus feat at 3rd level.

Animal Companion (Ex): At 4th level, a hunter gains an animal companion selected from the following list: badger, camel, dire rat, dog, riding dog, eagle, hawk, horse (light or heavy), owl, pony, snake (Small or Medium viper), or wolf. If the campaign takes place wholly or partly in an aquatic environment, the following creatures may be added to the hunter's list of options: crocodile, porpoise, Medium shark, and squid. This animal is a loyal companion that accompanies the hunter on their adventures as appropriate for its kind.

This ability functions like the wild childe's ability of the same name, except that the hunter's effective wild childe level is their hunter level-3. A hunter may select from the alternative lists of animal companions just as a wild childe can, though again their effective wild childe level is half their hunter level. Like a wild childe, a hunter cannot select an alternative animal if the choice would reduce their effective wild childe level below 1st.

Studied Strikes (Ex): Starting at 4th level, a hunter's studies carry their strikes further. Against their studied prey, they gain +1 bonus made to melee attacks and ranged attacks within first range increment.

This bonus increases to +2 at 10th level, and to +3 at 15th level.

Spells: Beginning at 4th level, a hunter gains the ability to cast a small number of divine spells, which are drawn from the hunter spell list. A hunter must choose and prepare their spells in advance (see below).

To prepare or cast a spell, a hunter must have an Intelligence score equal to at least 10 + the spell level. The Difficulty Class for a saving throw against a hunter's spell is 10 + the spell level + the hunter's Intelligence modifier.

Like other spellcasters, a hunter can cast only a certain number of spells of each spell level per day. Their base daily spell allotment is given on the class progression table. In addition, they receive bonus spells per day if they have a high Intelligence score. When the class progression table indicates that the hunter gets 0 spells

per day of a given spell level, they gain only the bonus spells they would be entitled to based on their Intelligence score for that spell level.

A hunter may prepare and cast any spell on the hunter spell list, provided that they can cast spells of that level, but they must choose which spells to prepare during their daily meditation.

Through 3rd level, a hunter has no caster level. At 4th level and higher, their caster level is one-half their hunter level.

Accelerated Restudy (Ex): Starting at 7th level, a hunter's ability to swap their studied prey increases and they from then on need only one day of downtime to study new prey from their list.

At 12th level, required time drops to an hour.

Woodland Stride (Ex): Starting at 7th level, a hunter may move through any sort of natural undergrowth (such as thorns, briars, overgrown areas, and similar terrain) at their normal speed and without taking damage or suffering any other impairment. However, they are still affected by enchanted or magically manipulated thorns, briars, and overgrown areas.

Swift Tracker (Ex): Beginning at 8th level, a hunter can move at their normal speed while following tracks without taking the normal -5 penalty. They take only a -10 penalty (instead of the normal -20) when moving at up to twice normal speed while tracking.

Evasion (Ex): At 9th level, a hunter can avoid even magical and unusual attacks with great agility. If they make a successful Reflex saving throw against an attack that normally deals half damage on a successful save, they instead takes no damage. Evasion can be used only if the hunter is wearing light armor or no armor. A helpless hunter does not gain the benefit of evasion.

Extra Prey (Ex): Starting at 9th level, a hunter can divert some of their attention to study an extra prey from their list of available species. Against this second prey, the hunter's studied prey bonuses to damage and skill checks are halved (round down) and their studied strike bonuses are lowered by one (minimum 0).

At 18th level, a hunter can study a third prey. Against this third prey, a hunter gets a +2 bonus to skill checks and damage through studied prey, and a +1 bonus to attacks through studied strike features, but these bonuses do not increase at higher levels.

Whenever a hunter changes their prey through restudy, they can also change extra prey as well.

Camouflage (Ex): A hunter of 13th level or higher can use the Hide skill in any sort of natural terrain, even if the terrain doesn't grant cover or concealment.

Hide in Plain Sight (Ex): While in any sort of natural terrain, a hunter of 17th level or higher can use the Hide skill even while being observed.

Immediate Restudy (Ex): At 20th level, a hunter's studies reach their pinnacle and the hunter can change the focus of their study with lightning speed. Required time to change to a different creature type from their list drops to a minute.
